EDUCATION

Cornell University M.P.S. in Information Science (Incoming) Ithaca, NY	Fall 2026
New York University, Tisch School of the Arts BFA, Interactive Media Arts New York, NY	Aug 2023 - Dec 2025
• GPA: 3.952/4.0; Summa Cum Laude; Tisch Dean's List, 2023-2025.	

RESEARCH & PRODUCT EXPERIENCE

Research Intern Tsinghua Future Lab Beijing, China	Jun 2026 - Present
• Develop research protocols for VR-based, AI-agent-mediated interviews, translating research questions into usability tests and semi-structured interview plans.	
• Conduct literature reviews on sleep-intervention research and process assigned multimodal datasets with project-provided scripts to identify evidence-based design opportunities.	
Design & Development Intern Dunes Institute Hybrid	Jul-Sep 2025; May-Jun 2026
• Designed and shipped an end-to-end interdisciplinary dictionary platform, owning research, information architecture, wireframes, responsive UI, implementation, and deployment.	
• Built HTML/CSS/JavaScript interfaces plus backend and admin workflows for content management, user-activity tracking, uploads, and live system updates.	
UX Design Intern Cyber Partner AI Shanghai, China	May-Jun 2025
• Designed B2B website wireframes and prototypes for LLM products; partnered with developers to refine usability and support launch.	
• Researched LLM commercialization and embodied-robotics use cases, and authored clearer, task-oriented robotics operation documentation.	

SELECTED RESEARCH & DESIGN PROJECTS

UnderCurrent UX Research & Product Design	2025
• Analyzed 1,000+ community posts and conducted 11 in-depth interviews to identify emotional behavior patterns in online fan communities; translated findings into a four-stage interaction framework.	
Chirp System Design & Hardware Interaction	2025
• Designed and prototyped a LoRa-based multi-device health-signal system connecting wearables, community dashboards, and operational interfaces for older adults living alone.	
Legends at NYU Service Design & Gamified Systems	2024-2025
• Designed a collaborative tabletop experience to reduce participation anxiety among international students; iterated mechanics through multiple playtests.	

SKILLS

Research: Semi-structured interviews, usability testing, literature review, qualitative synthesis, concept/prototype evaluation, market scanning
Design & Development: Figma, Adobe Suite, HTML, CSS, JavaScript, Python, R, Java, Unity, Fusion 360, Arduino
AI Tools: ChatGPT, Claude, Claude Code, Codex, Cursor, Gemini, Runway, Midjourney, Suno
