Summer internship availability: May 22 - Aug 23, 2027 | Open to relocation

EDUCATION

Cornell University **Ithaca, NY**
MPS in Information Science Expected Dec 2027
- Teaching Assistant: Human-Computer Interaction Design
- Coursework: Human-AI Interaction Design Research, Object-Oriented Programming and Data Structures

New York University **New York, NY**
BFA in Interactive Media Arts Dec 2025
- **GPA**: 3.952/4.0 | **Summa Cum Laude** | **Tisch Dean's List,** 2023-2025

SKILLS

Development: JavaScript, HTML, CSS, Responsive Web Development, Canvas, Node.js, SQLite, Java, Python
Design & Prototyping: Figma, Adobe Creative Suite, Interaction Design, Design Systems, Wireframing, Interactive Prototyping
Research: User Interviews, Usability Testing, Open Coding
Languages: Mandarin (Native), English (Professional)

WORK EXPERIENCE

Web Designer & Full-Stack Developer Intern | Dunes Creative | Hybrid May–Jun 2026; Jul–Sep 2025
- Independently designed and built **responsive, interactive web interfaces** for Dunes Dictionary using JavaScript, HTML, CSS, and Canvas, translating research and wireframes into a launched public website.
- Implemented **bilingual search and an interactive Canvas map**, including animated navigation to entries and links between related concepts.
- Built the admin dashboard and Node.js/Express APIs for **user-behavior analytics**, with SQLite event storage and views of visits, searches, and entry engagement.
- The project was featured in *Next Culture Producer, Season 4: Text*, a Chanel Culture Fund and Power Station of Art initiative.

UI/UX Design Lead, Part-Time | Dunes Creative | Remote Jul 2026 – Present
- Lead **end-to-end UX and interface design** for Waybox, a companion app for an AI-powered device, translating client requirements into information architecture, user flows, wireframes, and high-fidelity screens.
- Direct a **three-person design team** by setting weekly priorities, coordinating progress, and reviewing deliverables; partner with client stakeholders to validate flows and refine interaction and interface specifications.

UX Research Intern | Tsinghua Future Lab | Beijing, China Jun–Sep 2026
- Designed research protocols and conducted participant sessions for a **58-participant mixed-methods study** comparing AI-led and human-led sensitive interviews in VR, using questionnaires, in-depth interviews, and eye tracking.
- Open-coded **22 hour-long interview recordings** and synthesized qualitative themes to inform the design of more trustworthy and emotionally appropriate AI interviewers.

Designer & Front-End Developer, Volunteer | SheNicest | Remote Mar–Sep 2026
- Design and develop a responsive website for a women-focused technology and design community, spanning UI/UX design and front-end implementation.

UI/UX Design Intern | Cyber Partner AI | Shanghai, China May–Jun 2025
- Designed wireframes and prototypes for the company's B2B website; collaborated with developers to improve usability and support a smooth launch.
